Eleanor:

I did not check to see if we identified what samples are on-site vs what is in the offsite areas (residential, alleyway, drainage ditch, etc).

Thanks
Gary Moore

Thanks Gary! I'll insert our respective soil PCLs into the spreadsheet and evaluate the information. I'll get back to you early-mid next week.

On the topic of disposal of <50 ppm PCBs..TCEQ had a very old (1996) [PCB guidance document](#) (out of publication but still archived on our public website) that referenced the following disposal facilities in TX that at least at the time had been authorized to manage:

Nonhazardous industrial wastes containing less than 50 ppm PCBs may be disposed of in one of the following disposal facilities:

- *Texas Ecologists, Robstown, Nueces County*
- *Rollins, Deer Park, Harris County*
- *Chem Waste Management, Port Arthur, Jefferson County BFI Gulfwestern, Anahuac, Chambers County*
- *Western Waste, Conroe, Montgomery County*
- *Laidlaw Environmental Response, Altair, Colorado County CSC/Republic Waste, Ellis County*
- *BFI Waste Disposal Center, Sinton, San Patricio County.*

Eleanor:

Attached is the historic data in the table. Please take a look and let me know what you think would be the contaminants of concern for TCEQ. The yellow marked items are based upon our most stringent Regional Screening Levels. I suspect we will have similar data once we get the results back from our recent sampling activities. I will keep you up to date.

Thanks
